

DOMAINE JACQUES PRIEUR

Echézeaux Grand Cru 2010

2010: a small crop of beautiful grapes

After an interminably long, cold winter, proper spring weather set in during the month of April with above-average temperatures that enabled the vines to start growing quickly. Bud break took place over just a few days around the 20th of April. The poor, cool weather in June caused a great deal of coulure (shot berries) and flowering was upset as a result. The first two weeks of July were warm and sunny. Véraison (colour change) began at the usual time in mid-August, but lasted for several weeks due to rain and cool temperatures. The grapes took their time to ripen. Fortunately, sunny weather returned in early September and lasted for three weeks. A small crop with undersized berries and well-aerated bunches made it possible to maintain the fruit in good, healthy condition and obtain good ripeness. However, it took a great deal of reflection before deciding when to pick each plot. We did not react in a panic-stricken way to what was wrongly described as deterioration of the grapes!

GRAPE VARIETY & PLOT SIZE

Grape variety: 100% Pinot Noir on a 0.36 hectare plot

TERROIR

Located in "Champs Traversins", in the heart of the historic Echézeaux vineyard, the vines are planted in north/south rows at the end bordering on La Combe d'Orveau.

Fairly thin brown soil. Very fine sandy/siliceous gravel on the surface.

Perfect microclimate: cool, well-ventilated, and healthy thanks to an air current.

VINIFICATION & AGEING

The grapes were handpicked into small crates, then sorted and totally destemmed. The wine stayed on the skins for 21 days in temperature-controlled open oak vats. Pigeage (punching down the cap) was done twice a day during alcoholic fermentation.

100% malolactic fermentation

The wine was aged entirely in new oak barrels.

Duration of barrel ageing: 18 months
